Professional Summary

Computer Science graduate from King Khalid University with a strong academic record (CGPA: 4.21/5), specialized in Intelligent Systems. Interested in building a career in Data Analysis and Data Science. Strong foundation in data analysis, databases, and front-end development, supported by hands-on training and technical projects. Demonstrates the ability to extract insights from data and develop technology-driven solutions that support decision-making. Highly motivated to continuously develop skills in data-driven fields.

Education

- **Bachelor's Degree in Computer Science – King Khalid Uni | 2024 | CGPA: 4.21/5 - Specialization: Intelligent Systems**

Professional Experience

Front-End Development Internship – Wajahet Al-Mubtakir | 6 Weeks | 2024

- Intensive training focused on front-end development and building modern, responsive web applications
- Strengthened core web development skills and bridged academic knowledge with real-world application development
- Learned how front-end systems communicate with backend services through APIs
- Developed and maintained responsive web pages using HTML5 and CSS3
- Assisted in building interactive and user-friendly web interfaces
- Translated UI/UX design mockups into functional front-end components

Projects

Graduation Project: Electronic Will Application | 2023–2024 - GitHub: [Link](#)

- Developed an application enabling users to create wills and securely link them to their digital identity
- Enabled assignment of an authorized person to access assets and the will after death
- Focused on delivering a smooth user experience with strong privacy and security measures

Project: Airport Database Management System | 2023 - GitHub: [Link](#)

- Developed a comprehensive database system to streamline airport operations
- Covered flight scheduling, baggage tracking, and passenger management processes
- Developed SQL queries (DDL & DML) for table creation, constraints, and data manipulation
- Improved operational efficiency by reducing manual errors and improving data accuracy

Project: Pac-Man Game (Unity) | 2023 - Live Demo: [Link](#)

- Developed a classic Pac-Man-inspired game using Unity engine
- Implemented player movement and enemy behavior mechanics
- Applied core game development concepts such as interaction and AI behavior

Certifications & Courses

- Digital Strategy & Artificial Intelligence – MCIT | 2025
- Fundamentals of Game Development – MCIT | 2025
- Data Analysis – Misk Professional Preparation Program | 2024
- Crisis Management – Ministry of Communications and Information Technology | 2024
- Data Science & Machine Learning – SmartMethods | 2024
- Front-End Development Course – Innovative Interface | 2024

Skills

- Professional Skills: Data Analysis | Problem Solving | Analytical Thinking | Database Management | AI Fundamentals
- Technical Skills: Java | Python | SQL | Dart | Flutter | HTML5 | CSS3 | JavaScript | React | Python (Pandas) | R Programming | Machine Learning Algorithms | Power BI | SQL | NoSQL | Data Protection | Network Security | Microsoft Word | Microsoft Excel
- Personal Skills: Teamwork | Communication | Organization | Fast Learning | Innovation

Languages

- Arabic – Advanced - English – Advanced
